BEWARE! Common mistakes/frauds

The PO9 has run into a lot of mistakes (or maybe frauds?) when dealing with burners attempting to send mail.

How 'bout dem apples?

This is **NOT** a valid postcard stamp, check the face value.

It does look a lot like one of the [2013 Apples postcard stamps](#), however.

I think the USPS made a mistake in issuing something so similar.

Round does **NOT** mean international.

Check the face value, 'Forever' is **NOT** 'Global Forever'.

I blame this one squarely on the USPS. In form and design, it is nearly identical to the [Global Forever](#) stamps. That's just lazy.

That's **NOT** a Moon!

Check the face value, 'Forever' is **NOT** 'Global Forever'.

Just because it's the Moon, doesn't make it a 'Global Forever' stamp.

The Earth is **NOT** alone.

Check the face value, 'Forever' is **NOT** 'Global Forever'.

Not all Earths are created equal. :)
